

MediaShout for Mac v1.1.4986 FIXES

Application

- 6013 Upgrade to XCode 4 and SDK to 10.6
- 6014 Grand Central Dispatch for Script Pane Refresh
- 6032 Formstack Integration
- 6033 Implement Uninstaller.
- 10577 Resource Manager: Showing media "Not installed" after closing & reopening
- 10757 Resource Manager: Decks in Media tab lose data after bibles finish importing
- 10961 Deck Pane: Custom size reverts back to the original after closing and reopening
- 10964 Deck Pane: Decks go blank after Boulder is inactive for a while, crashes
- 10969 Display: Crash when selecting different monitor as the Main display screen
- 10979 Script File: Cue graphic has to be found / thumbnail not showing up for cue saved after script is already saved as packaged file
- 10980 Script file: Video associated with saved script file not found / thumbnail not showing up
- 11000 App crashed while saving
- 11006 Playing media from the deck = crash
- 11007 Editing while live = crash
- 11009 Menu section for access to content store
- 11011 Screen flicker with multiple displays
- 11013 Application crashes, when user opens a script in Cue Deck a few times.
- 11015 Decks panel is cut off, when user change the size
- 11025 If user drags border to right as far as it can go and then drags border to left as far as it can go, as result application hangs.
- 11053 Application crashes, when user selects the same monitor for Main display, that already selected as Control
- 11058 Some preferences cannot be set.
- 11059 Set Nalpeiron trial to 30 days
- 11064 Upgrading the app for a user who upgraded from 10.6 to 10.7, the app may not start

Script Pane

- 10879 Auto-Scroll not scrolling to the highlighted cue correctly when playing through cues
- 10984 Cue not dropping into intended drag position
- 11026 Application hangs, when user tries to drag the Script Pane.

Cue Editor (CE)

- 10956 Cue thumbnail does not match CE's preview edit window
- 10987 Cue Editor changes are immediately reflected on Main display screen for looping cues

Text Issues (all cues)

- 10882 Footer automatically changes to header text color when clicking inside header text box
- 10901 Page break causes preview/edit window to turn blank white for additional pages in CE
- 10934 Vertical alignment text property is automatically changed when selecting another text property in CE
- 10955 Vertical alignment setting is not reflected correctly on Main display screen
- 10991 Changing "Cue Name" value in CE automatically changes sub page names to match/ change is immediately reflected in main cue
- 1043 Pagination issues
- 1044 Margin issues.

Lyric Cues & Song Deck

- 10862 Copying text in the Data tab in Cue Editor (CE) will disable editing in Preview/Edit box for all layers
- 10922 Duplicate song records created when opening a script containing songs that were imported from that same script file
- 10940 Character Encoding Errors when Importing .txt Song Libraries
- 10960 Cue thumbnails for split verses not reflecting new picture assigned in CE
- 10994 App takes a long time to open after importing a lot of songs
- 11002 Stanzas cannot be rearranged once added to the play order.
- 11003 Incorrect highlighting of dragged songs
- 11004 Deleting Stanzas causes MS to hang and have to cancel changes
- 11039 If user open Cue Editor for the song from Song Deck and then close Cue Editor, Cue Editor isn't opened next time, when user will
- 11048 When user tries to delete the song from Song Library twice, application hangs.
- 11066 CCLI downloading broken on 10.7 (no bug entered).

Text Cues & Text Deck

- 10916 Text Deck not reflecting applied template after creating a new one in CE
- 10997 Copy and Paste into New Text Cue causing more Text Deck issues

Graphic Cues & Still Backgrounds

- 10823 Image: Default image size of split page after inserting a page break is Original Size
- 10957 Cannot access selection tool for marquee box when picture is resized & centered in the middle of the preview/edit window
- 10998 Repositioning a PDF cue in the CE causes the Script thumbnail to be incorrect.

Video Cues & Video Backgrounds

- 10947 Video cue set to "End of Picture" not transitioning when fast-forwarding through the video
- 10983 Crash when file browsing during video playback
- 10990 Playback pauses when opening CE, editing in CE, and clicking OK to save in CE
- 11071 Stutter in video cue

Audio Cues & Soundtracks

- 10704 Text layer on audio cue does not work
- 10789 Audio does not fade in correctly when Advance Type is set to Immediately
- 10928 Audio will glitch & pause for a second or two then start again when clicking Apply or OK to close CE after editing
- 11031 If user clicks Stop button when sound cue is played, application crashed.

Section Cues

- 11014 If user drags cue into the Section, this cue isn't displayed
- 11023 Impossible to move the Section with the content between the cues, that were dragged together.

Key Text & Countdown Clock

- 10777 Key Text: Vertical Alignment setting not being reflected in Cue Editor's Preview/Edit window

Script Commands

- 10913 Script Command's Inspector window opens upon launching the app
- 10954 When used inside a Section cue: SC settings are not saved when re-opening a saved script
- 10986 Script Command: SC cue not jumping to the correct first cue of a loop when Command cue is inserted as the 1st cue in the script pane
